

Price quote for fireproof cable trays in Russia

AI Overview

Fireproof cable trays in Russia typically range from \$50 to \$300 per meter, depending on material, fire rating, and supplier. Overview of Fireproof Cable Trays Fireproof or fire-resistant cable trays are designed to protect electrical wiring in industrial, commercial, and critical infrastructure projects. Common types include ladder trays, perforated trays, solid-bottom trays, and wire mesh trays, made from galvanized steel, stainless steel, aluminum, or polymer composites. Fire ratings often range from 60 to 120 minutes, and many trays are halogen-free and low-smoke (LSZH) to comply with safety regulations. Factors Affecting Price Material: Stainless steel and aluminum trays are more expensive due to corrosion resistance and fireproofing properties, while polymer or galvanized steel trays are more affordable. Fire Rating: Higher fire resistance (e.g., 120 minutes) increases cost. Tray Type and Size: Ladder and perforated trays are generally mid-range, while solid-bottom or specialized compact trays for high-density cabling are pricier. Supplier and Certification: Domestic suppliers like UralTray, Sevcable Structures, and Moskabelmet offer competitive pricing with compliance to Russian GOST R standards, while imported trays may cost more due to sanctions and import duties. Estimated Price Range Standard fireproof ladder or perforated trays: \$50-\$120 per meter High-grade stainless steel or solid-bottom trays: \$150-\$300 per meter Specialized trays for data centers or industrial plants: \$200-\$300 per meter, depending on load capacity and fireproof coatings Procurement Tips Verify fire rating certificates and compliance with Russian electrical safety standards (GOST R). Consider domestic suppliers to reduce lead times and import costs. Evaluate total cost of ownership, including installation, maintenance, and potential integration with firestop systems. For large projects, negotiate bulk pri...
