

Price quote for home lighting distribution boxes

AI Overview

Household lighting boxes typically range from \$20 to \$150, while residential distribution boxes cost between \$50 and \$500 depending on type, capacity, and features. Lighting Distribution Boxes Household lighting distribution boxes, such as those used for controlling multiple lighting circuits, vary in price based on number of outlets, material, and compatibility with control systems. For example, flex7 Lighting Distribution Boxes offer models with 2 to 12 outlets, robust anodized aluminum construction, and compliance with wiring regulations, with expansion options available for additional capacity. Prices for standard residential lighting boxes generally start around \$20-\$50 for basic 2-4 outlet units and can reach \$100-\$150 for larger, multi-outlet or smart-compatible units. Electrical Distribution Boxes Distribution boxes, also known as breaker panels or sub-panels, serve as the central hub for electricity in a home. Prices depend on type, capacity, brand, and additional features:

- Main breaker panels: Central point for incoming power; prices typically range from \$100 to \$400 for standard residential single-phase panels.
- Sub-panels: Used to distribute power to specific areas; usually cost \$50 to \$200 depending on the number of circuits.
- Fuse boxes: Older style with replaceable fuses; generally \$50-\$150.
- Transfer switches: For automatic backup power; more complex units can cost \$300-\$500 or more.

Additional factors influencing cost include number of circuits, amperage rating, surge protection, smart monitoring, and weather-resistant enclosures. Industrial-grade or commercial boxes are significantly more expensive due to higher durability and capacity requirements. Where to Buy Online retailers like Amazon offer a variety of power distribution boxes for residential and construction use. Specialized lighting suppliers such as Gotham Lighting Supply pro...
