

Prices of professional electrical distribution boxes in Algeria

AI Overview

Professional electrical distribution boxes in Algeria typically range from 10,000 DZD to over 150,000 DZD depending on type, size, and specifications.

Price Overview

The cost of electrical distribution boxes in Algeria varies widely based on several factors:

- Standard residential or small commercial boxes:** These are usually pre-assembled plastic or metal enclosures for 6–24 modules, priced around 10,000–30,000 DZD. They are suitable for small installations and basic protection needs (Electrissima, Electris).
- Industrial or larger commercial distribution boxes:** Metal or polycarbonate enclosures for 36–72 modules, often with pre-installed breakers or busbars, typically cost 40,000–100,000 DZD. These are used in factories, offices, or large buildings (Electric Center, Europages listings).
- Explosion-proof or ATEX-certified boxes:** Designed for hazardous environments, such as chemical plants or oil facilities, these specialized boxes can range from 80,000 DZD to over 150,000 DZD, depending on size, material, and certification (ELECAD).

Factors Affecting Price

- Material:** Plastic (ABS or polycarbonate) is cheaper than galvanized steel or stainless steel.
- Size and module capacity:** Larger boxes with more DIN modules cost more.
- Pre-assembled vs. custom-built:** Custom or tailor-made cabinets with integrated breakers, meters, or automation components increase the price.
- Certifications:** ATEX or IP-rated enclosures for industrial safety are more expensive.
- Brand and supplier:** International brands like Hager, ABB, or Schneider tend to be higher priced than local generic options (Electrissima, Electris).

Suppliers in Algeria

- Electrissima:** Offers a wide range of ABB distribution boxes for residential, commercial, and industrial use.
- Electric Center:** Distributor of over 3,000 electrical products, including industrial distribution boxes.
- ELECAD:** Specializes in ATEX and explosion-proof electrical enclosures.
