

Quotation for 8-core fiber optic patch panel

AI Overview

8-core fiber optic patch panels are available from \$1.50 to \$30 per unit, depending on configuration, connector type, and supplier. Product Overview An 8-core fiber optic patch panel is a compact and essential component for structured cabling systems, enabling efficient organization, management, and distribution of fiber optic connections. These panels are suitable for data centers, enterprise networks, telecom facilities, and industrial applications. They support various connector types such as SC, LC, FC, and MPO/MTP, and can accommodate both single-mode and multimode fibers. Pricing Alibaba suppliers list 8-core fiber patch panels at \$1.50 to \$30 per unit, depending on interface type, material, and order quantity. FiberCheap and PHX Fiber offer high-quality panels with durable steel construction, dust-proof design, and good sealing, with prices described as reasonable but requiring direct inquiry for exact quotations. FiberOrigin provides factory-direct pricing including shipping and trading charges, with sample orders available for evaluation. Delivery for samples is typically 3-7 days, and full production within 30 days, depending on order quantity. Ordering and Customization Many suppliers allow customization of port types, fiber modes, and mounting options. Panels can be shipped via DHL, FedEx, UPS, TNT, EMS, or Aramex, with buyers responsible for import fees. Bulk orders are supported, and suppliers often provide discounts for larger quantities. Recommendations Choose a panel with cable management features and labeling options to simplify installation and future upgrades. Verify connector compatibility with your existing network equipment. Consider future scalability; an 8-core panel is ideal for small to medium networks but can be expanded with modular designs. For an accurate quotation, it is recommended to contact suppliers directly with your specifications, desired quantiti...
