

Russian 3C Distribution Box Certification

AI Overview

Scheme 3C certification is used for batches of electrical equipment, including distribution boxes, to confirm compliance with Russian and EAEU technical regulations. Overview of Scheme 3C Certification Scheme 3C is a batch certification procedure for equipment produced or imported into the uniform customs territory of the Eurasian Economic Union (EAEU), which includes Russia, Belarus, Kazakhstan, Armenia, and Kyrgyzstan . It is specifically designed for equipment batches, rather than single units or serial production, and ensures that all products in the batch meet the required technical standards. Key Requirements Batch Definition: The manufacturer or importer must provide a batch of equipment produced in the EAEU or imported into it . Technical Documentation: The manufacturer must prepare and maintain technical documentation demonstrating compliance with applicable TR CU/EAEU technical regulations . Labeling: All products in the batch must carry the uniform EAC mark, indicating conformity with EAEU standards . Conformity Assessment: The certification process may involve testing by an accredited laboratory and verification by a Products Certification Body . Certification Process Application Submission: The manufacturer or authorized importer submits an application to a certified body, including batch details and technical documentation . Testing and Evaluation: The batch may undergo testing to ensure compliance with relevant electrical safety, EMC, and operational standards . Issuance of Certificate: Upon successful evaluation, a TR CU/EAEU Certificate of Conformity is issued for the batch, allowing legal sale and distribution within the EAEU . Surveillance: While scheme 3C focuses on batches, manufacturers are expected to maintain consistent production quality for future batches . Related Certification Types TR CU/EAEU Certificate of Conformity: Confirms compliance with EAEU technical regulations and allows trade across member states . Declaration of Conformity: A self-declaration by...
