

S5700 Extended Optical Module

Rear of the optical fiber distribution box

Overview

The Huawei ES5D000X4S00 is an enterprise switch interface module designed to expand Huawei S5700SI and S5700EI series with high-density 10G uplinks. (Video) [Network Encyclopedia] What Is Smart Access (Video) Wired and Wireless Convergence Feature Introduction. How to Stack Huawei S5700-28X-LI-AC Switches Through Service Ports?

Solution: The stacking method and steps for Huawei S5700-28X-LI-AC Switch are as follows: The connection topology for service port stacking includes chain and ring connections. This optical interface card provides 4×10G SFP+ ports with wire-speed forwarding, enabling reliable, low-latency aggregation in campus and data center. The S5700&S5710 Series switch (S5700 for short) is an enterprise network access device that provides access and data transport functions. The S5700 is developed by Huawei to meet the requirements for reliable access, aggregation, and high-quality transmission of multiple services on enterprise.
