

Secondary distribution box for construction site in Suriname

AI Overview

Prefabricated secondary distribution boxes, such as ZBW-type substations, are suitable for construction sites in Suriname, offering flexible capacity, safety, and rapid installation. Overview For construction sites, a secondary distribution box serves as a centralized point to distribute electrical power safely to various temporary loads. In Suriname, ZBW-type prefabricated substations are widely used for such purposes. These units integrate high-voltage switchgear, distribution transformers, low-voltage switchgear, energy metering, and power factor compensation devices in a single or modular enclosure, making them ideal for construction environments. Technical Specifications Transformer Capacity: 50 kVA to 1600 kVA, suitable for small to large construction sites. Rated Voltage & Frequency: 10/0.4 kV, 50 Hz network. Protection Level: IP23D, ensuring safety against dust and water ingress. Environmental Tolerance: Ambient temperature: -25°C to 40°C Relative humidity $\leq 90\%$ Wind speed ≤ 34 m/s Ice thickness ≤ 20 mm Pollution level II or III Structural Features: Welded channel steel base frame for high strength; composite enclosure materials reduce solar heat radiation. Installation Considerations Must be installed on stable ground with slope $\leq 5^{\circ}$ Avoid locations with fire, explosion risk, severe pollution, chemical corrosion, or intense vibration Short installation cycle allows rapid deployment on construction sites Local Suppliers and Support Elgawa N.V.: Licensed distributor of ABB, Legrand, and other international brands; provides installation, maintenance, and technical support for electrical systems and generators in Suriname. Suriname Supplies: Offers European-quality industrial equipment suitable for construction and mining projects, including electrical distribution components. Regulatory and Safety Notes Ensure compliance with local building and electrical codes Obtain necessary e...
