

Singapore Fire Protection Cable Tray Prices

AI Overview

Fireproof and fire-resistant cable trays in Singapore range from approximately SGD 50 to SGD 500 per meter, depending on material, type, and load capacity.

Types and Materials

- FRP/GRP Cable Trays** Made from fiberglass-reinforced polyester with fire-retardant resins. Fire-retardant options include Isophthalic Polyester (IFR) and Vinyl Ester, meeting Class 1 fire ratings according to ASTM E84. Advantages: corrosion-resistant, non-conductive, UV-resistant, and low thermal conductivity, ideal for chemical plants, refineries, and outdoor installations. Typical price range: SGD 150–500 per meter, depending on resin type and load capacity.
- Steel Cable Trays** Electro-galvanized, hot-dipped galvanized, or epoxy-coated steel options. Available in light, medium, heavy, and super heavy-duty grades. Fire-resistant when coated or used with fireproof covers. Suitable for industrial and commercial applications with high load requirements. Typical price range: SGD 50–200 per meter, depending on thickness, coating, and duty rating.
- Aluminum Cable Trays** Lightweight, corrosion-resistant, and suitable for outdoor or humid environments. Fire-resistant designs are available, often used in combination with fireproof coatings. Typical price range: SGD 100–300 per meter.
- Stainless Steel Cable Trays** Highly resistant to corrosion and chemicals, ideal for harsh or hazardous environments. Fire-resistant and durable, often used in marine or chemical facilities. Typical price range: SGD 200–500 per meter.

Additional Considerations

- Load Capacity:** Ensure the tray supports the weight of your cables. Heavy-duty trays cost more.
- Standards Compliance:** Look for trays meeting IEC, NEC, or Singapore fire safety regulations.
- Installation:** Open designs allow easy maintenance and modifications, reducing labor costs.
- Outdoor Use:** UV-resistant and corrosion-resistant...
