

Singapore Mesh Cable Tray Specifications

AI Overview

Mesh cable trays in Singapore are typically made of stainless steel or galvanized steel, comply with IEC 61537 and local standards, and offer flexible, open-structure designs for efficient cable management.

Materials and Finishes Mesh cable trays are commonly manufactured from stainless steel (304, 316, 316L), hot-dipped galvanized steel (HDG), galvanized zinc-plated steel (GI), aluminum, or epoxy-coated mild steel to suit different environmental conditions. Stainless steel options provide high corrosion resistance, making them suitable for offshore, marine, or humid environments. Finishes may include EZ, EZ+, GC, and other certified coatings for durability and compliance with safety standards.

Load Capacity and Duty Ratings Cable trays are classified by duty levels to support varying cable weights:

- Light Duty: 13mm thickness, suitable for small cable bundles
- Medium Duty: 25mm thickness, for moderate cable loads
- Heavy Duty: 50mm, 75mm, 100mm and above, for industrial or high-density installations

Load capacity should be verified against manufacturer specifications to ensure safe support for the intended cable volume.

Design and Structure Mesh cable trays feature a 90% open structure, allowing:

- Efficient airflow to prevent cable overheating
- Easy visual inspection and maintenance
- Minimal dust or water retention, enhancing safety and reducing cleaning costs

The trays often include patented safety edges and T-joint systems to prevent hand injuries during installation. Quick-fix systems like Faslock auto allow bends and directional changes on-site without special tools.

Standards and Compliance Singapore mesh cable trays typically comply with:

- IEC 61537 (international standard for cable tray systems)
- NEMA VE-1 (North American standard for metallic cable trays)
- SS249 (Singapore standard)

Certifications such as E30/E90 fire rating, ABS, and DNV for offshore applications.

Accessories and Installation A complete range of support systems is available, including: Wall brackets, suspension brackets,...
