

Single-mode PCI fiber optic network card

Overview

The high-performance PCI-E SC fiber network card delivers 1000Mbps internet access while supporting full-duplex operation for up to 2000Mbps total bandwidth capacity, effectively eliminating server bottlenecks in demanding data center applications. PCI/PCI-E Network Adapter Card is also called PCI Network Adapter, PCI Network Card, or NIC for short. It acts as the interface between a computer and a optical fiber network cable. Fiberinthebox. Whether you're upgrading a workstation, scaling a small business network, or building out a hyperscale data center, a fiber network card (NIC, network interface card) is one of the most critical components for connectivity. Copper Ethernet NICs still have their place, but when bandwidth, distance. Our AI beta will help you find out quickly. Did You Find It?
