

Specifications of Egyptian Waterproof Distribution Box

AI Overview

Egyptian waterproof distribution boxes typically feature IP65 protection, ABS or polycarbonate construction, and dimensions suitable for indoor and outdoor electrical installations.

Key Specifications

- Material:** Sturdy ABS plastic or polycarbonate, offering impact resistance up to IK08 for durability in harsh environments.
- Ingress Protection:** IP65–IP68, ensuring protection against dust, rain, and UV exposure, suitable for outdoor and industrial applications.
- Dimensions:** Common sizes include 215mm (W) x 210mm (H) x 115mm (D), with smaller options like 100mm x 100mm x 50mm also available.
- Mounting Options:** Many boxes support DIN rail configurations, allowing flexible wiring and modular installation.
- Series Options:**
 - AT Series:** Compact, value-focused, ideal for tight spaces and straightforward cabling.
 - HT Series:** Larger internal space for extra terminals and cleaner routing, suitable for more complex installations.
- Applications:** Designed for power distribution, control, and protection against overloads and short circuits. Commonly used for lighting, pumps, solar systems, and general electrical panels.
- Environmental Features:** UV-stabilized housings for sun-exposed installations, compression gaskets maintain sealing after repeated openings, and flammability evaluated per UL 94 standards.

Additional Considerations

- Indoor/Outdoor Use:** IP65 rating ensures suitability for both indoor and outdoor environments, protecting terminals and modules from water and dust ingress.
- Customization:** Some suppliers offer custom sizing, pre-assembled solutions, and bulk orders to meet specific project requirements.
- Compliance:** Boxes are designed to meet IEC 60529 standards for ingress protection, ensuring reliable long-term performance.

These specifications make Egyptian waterproof distribution boxes a reliable choice for residential, commercial, and industrial electrical installations, pro...
