

Sri Lanka Electrical Distribution Box Customization Price

AI Overview

Customized electrical distribution boxes in Sri Lanka typically range from \$1.68 for standard 4-way units to higher prices depending on IP rating, material, and OEM customization. Base Prices and Market Overview Standard distribution boxes in Sri Lanka, such as 4-way commercial units, start at approximately \$1.68 per unit for locally manufactured high-impact polystyrene (HIPS) enclosures. Prices vary based on size, material, and protection rating. Retail platforms like Daraz.lk offer a wide range of distribution boxes at competitive prices for smaller quantities. Industrial-grade or outdoor enclosures with higher IP ratings (IP65 or above) and UV-resistant materials are priced higher due to enhanced durability. Customization

Options Customization can include: Color and branding (OEM logos or company colors) Enhanced IP ratings for outdoor or harsh environments Specialized terminal blocks or cable management systems Material upgrades such as metal or reinforced plastics Customized orders generally require 15–30 days lead time, depending on complexity, while standard units ship within 7–10 days. Suppliers like Cubik Engineering provide modular panel systems and full OEM services, allowing panels to be built to any design or specification. Bulk Discounts and Procurement For large projects, manufacturers often offer tiered pricing: Orders of 100+ units may receive 5–15% discounts Bulk procurement can reduce per-unit cost and shipping expenses Technical Considerations When selecting a distribution box, consider: IP rating: IP44 minimum for indoor, IP65+ for outdoor Material: UV-stabilized HIPS or metal for durability Compliance: SLS 1254 and relevant IEC standards Integration: Compatibility with existing electrical systems and conduit sizes Recommended Suppliers Cubik Engineering Co. (Pvt) Ltd: Offers modular panels, outdoor enclosures, and OEM cust...
