

Stripping the fiber optic cable at the terminal box

Overview

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering techniques, tools, and best practices to help you achieve successful terminations in your fibre optic installations. Properly stripping the cable and preparing the fibre ends ensures a clean and secure connection, leading to optimal signal transmission and network performance. What happens if you damage the fiber during this production step?

A tiny scratch or nick in the optical fiber is like a time bomb. Eventually, this imperfection can initiate a crack when the. FTTp or fiber To The Premises applications have reinforced the importance of reliable and stable fiber optic terminations.
