

Supply of Low Voltage Cable Trays

AI Overview

Reliable low-voltage cable trays can be sourced from manufacturers like ABB, Legrand, and Direct Channel, offering a range of ladder, perforated, and wire mesh trays suitable for data, telecom, and control systems.

Recommended Suppliers

ABB: Offers a wide range of cable tray systems including perforated trays, cable ladders, channel trays, and strut framing. Their products are manufactured in Canada and Saudi Arabia, ensuring high quality and rapid delivery. ABB trays are adaptable, easy to maintain, and designed to prevent moisture buildup and cable damage, making them ideal for low-voltage installations.

Legrand: Known for Cablofil® wire mesh cable trays, Legrand provides durable, high-quality welded steel trays suitable for data centers, telecom, and control cabling. Their systems are easy to install, support heavy loads, and include accessories like fasteners and prefabricated assemblies for efficient cable management.

Direct Channel: Offers light, medium, and heavy-duty cable trays with pre-galvanized and hot-dipped galvanized finishes. Their trays come in various widths (50mm–600mm) and lengths (1m and 3m), with a full range of accessories including couplers, bends, tees, crossovers, and lids. These trays are robust, corrosion-resistant, and suitable for both internal and external low-voltage applications.

Types of Low-Voltage Cable Trays

Ladder Cable Trays: Ideal for heavy cable loads and high ventilation needs. They allow easy access for maintenance and are suitable for fiber optic, Cat6/6A/7, and control cables.

Perforated Cable Trays: Provide continuous support with ventilation holes, reducing mechanical stress on small-diameter cables. Commonly used for mixed low-voltage systems.

Wire Mesh Cable Trays: Lightweight, flexible, and easy to install. They are excellent for routing data and communication cables in complex layouts.

Selection Tips

Assess Cable Types and Quantities: List all cables (Cat6/6A/7, fiber optic, coaxial, control) and their diameters, including future expansion plans.
