

Three-phase quick-connect box

Overview

This CCB is a compact, high-performance quick-connect portable power distribution box designed to handle circuits rated at a maximum of 400 amps and 120/208 volts. It features a bottom-mounted camlock panel with Series 16 male camlocks to make installation faster than ever before. This allows the user to easily identify the correct phases for the generator connection. Available in 400 Amps with (5). The Quicktest is ideal for electrical shops, factories, labs and service departments. These units are available in models ranging from 400 to 4000 Amps, and are designed to provide. This Powertron MTS Series TBQCMM01 Tap Box offers a three phase 100A manual transfer switch and quick camlock connections to a mobile emergency generator, allowing you to receive temporary power quickly and safely. Emergency Power Ready: Makes your facility emergency power ready with. Roam's MTC® 6003 ESHKv series ("v" = Voltage Code) of Generator Interface Panels (Generator Connection Boxes) provide a rugged and cost-effective exterior connection point for emergency power.
