

UAE Fireproof Cable Tray Prices and Manufacturers

AI Overview

Fireproof cable trays in the UAE are available in FRP and steel variants, with prices varying by material, size, load rating, and supplier.

Types of Fireproof Cable Trays

FRP (Fiber-Reinforced Plastic) Cable Trays: Made from glass-armored thermoset fire-retardant resins, FRP trays are corrosion-resistant, UV-resistant, electrically insulating, and fire-retardant. They are ideal for environments where metallic trays may corrode, such as coastal or chemical-exposed areas. Available in perforated and ladder types, with accessories like bends, tees, reducers, couplers, clamps, and covers to meet project requirements (Ferrotech, Dubai).

Steel Cable Trays with Fireproof Coating: These include galvanized, hot-dip galvanized, powder-coated, and stainless steel trays. They are suitable for industrial, commercial, and infrastructure projects, offering high load-bearing capacity, structural stability, and long service life. Fireproof coatings or powder coatings enhance fire resistance while maintaining durability (Metar, Ruwais Steel).

Common Tray Types

Ladder Type: Side rails with rungs, good ventilation, easy cable entry/exit.

Perforated/Ventilated: Flat bottom with holes, supports small-diameter cables, allows airflow.

Solid Bottom: Fully enclosed, maximum cable protection.

Wire Mesh/Basket Tray: Lightweight, commonly used for telecom or data cables.

Channel/Through Tray: Light-duty routing, moderate ventilation and protection.

Factors Affecting Price

Material: FRP trays are generally more expensive than standard steel due to fire-retardant and corrosion-resistant properties. Stainless steel and HDG steel trays also command higher prices.

Size and Load Rating: Width, depth, thickness, and maximum load capacity influence cost. Larger or heavy-duty trays cost more.

Accessories: Bends, tees, reducers, couplers, clamps, and covers add to the total system cost.

Supplier and Volume: Bulk orders o...
