

Ukrainian Modular Data Center Explosion-Proof

Overview

De Novo data center was built on a modular basis and was put into operation in 2010. Using the example of the Reynaers company and their Sunrise explosion-proof system, we consider how, within the framework of joint projects, large companies are involved in the restoration of Ukrainian cities. We spent the New Year's holidays under fire: on December 29, Russia launched the most. Ukrainian hackers, who may be linked to cyber specialists of the Security Service of Ukraine, destroyed a data center used by the Russian military industry, oil and gas, and telecom. This was reported to Ukrainian News Agency by well-informed sources. So, according to sources, more than 10,000. The State Enterprise "ANTONOV" was founded on May 31, 1946 under the leadership of the outstanding aircraft designer Oleh Kostiantynovych Antonov. Since then, the company's team has created more than one hundred types and modifications of passenger, transport and specialised aircraft, manufactured. The Deep Atomic company presented the design of the MK60 small modular reactor developed specifically to provide power and cooling to data centers. With a focus on innovative and efficient energy management, the company serves multiple sectors. Data Centers in Ukraine - List of Colocation and Cloud data facilities in Ukraine.
