

Warranty for EDFA800G

At Overview

The EDFA800G is typically covered by a manufacturer warranty from Quantifi Photonics, and in the EU, it also benefits from a minimum 2-year legal guarantee against defects. Manufacturer Warranty Quantifi Photonics provides a limited manufacturer warranty for the EDFA800G, which generally covers defects in materials and workmanship from the date of purchase. The warranty period and specific terms, such as repair, replacement, or calibration discounts, are defined by the manufacturer and may vary depending on the model and purchase agreement. For example, calibration services are recommended every 12 months, and discounts may apply while the product is under warranty. To verify the warranty status, you should contact Quantifi Photonics directly or refer to the purchase documentation.

EU Legal Guarantee If you purchased the EDFA800G in the European Union, you are also protected by the EU consumer guarantee, which provides a minimum 2-year legal guarantee against faulty goods or products that do not function as advertised. This legal guarantee is independent of any manufacturer warranty and ensures that the seller is responsible for repair, replacement, or refund if the product is defective. Some countries may extend this period further under national law.

How to Check or Claim Warranty Locate the serial number of your EDFA800G, usually found on the device label. Contact Quantifi Photonics or the authorized distributor to confirm warranty coverage and claim eligibility. Provide proof of purchase and details of the defect or issue. For EU purchases, you can also request redress under the legal guarantee if the product is faulty within the 2-year period.

Additional Notes Manufacturer warranties may include optional extended service plans or calibration coverage. Always retain purchase receipts and warranty documentation to facilitate claims. Warranty coverage may not include damage caused by misuse, unauthorized modifications, or external factors. By combining the manufacturer war...
