

What major should I study for optical fiber and cable engineering

Overview

A bachelor's degree in electrical engineering, computer engineering, or a related field is typically required for entry-level positions in Fiber Optics Engineering. Some employers may also require a master's degree or higher. The second and third most common degree levels are associate degree degree at 18% and associate degree degree at 8%. Optical engineers design and develop devices and technologies that use light, such as cameras, lasers, microscopes, and fiber optics. During your undergraduate studies, you should expect to take courses in physics, calculus, and computer science, as well as specialized courses in circuit. The most relevant fields of study include Electrical Engineering, Telecommunications Engineering, or Optical Engineering. 17% of fiber optic technicians major in electrical engineering.
