

What router is best for a fiber optic interface

AI Overview

For fiber optic internet, routers with multi-gig Ethernet ports, Wi-Fi 6/6E or Wi-Fi 7 support, and strong coverage are recommended, such as the Netgear Nighthawk RS700S or RAXE500.

Key Features to Look For

1. **High-Speed Ethernet Ports:** Fiber internet often exceeds 1 Gbps, so routers with 2.5G or 10G WAN/LAN ports are ideal to fully utilize your connection. LAN aggregation can further increase wired speeds.
2. **Advanced Wi-Fi Standards:** Wi-Fi 6, 6E, or the latest Wi-Fi 7 routers provide higher throughput, lower latency, and better handling of multiple devices simultaneously. Wi-Fi 7 supports Multi-Link Operation (MLO), combining multiple bands for faster speeds.
3. **Coverage and Range:** Choose routers with multiple internal or external antennas and technologies like beamforming to ensure strong coverage across your home or office. Dual-band or tri-band routers help manage multiple devices efficiently.
4. **Device Capacity:** High-performance fiber routers can support 60–200 devices simultaneously, making them suitable for large households or small offices.
5. **Additional Features:** Look for built-in security (antivirus, firewall), parental controls, QoS, and gaming optimizations if needed.

Top Recommended Routers

- Netgear Nighthawk RS700S (Wi-Fi 7):** Supports multi-gig speeds, covers up to 3,500 sq. ft., handles up to 200 devices, and includes advanced security features. Ideal for gaming, streaming, and business use.
- Netgear Nighthawk RAXE500 (Wi-Fi 6E):** Offers 10.8 Gbps speeds, three Wi-Fi bands, and multi-gig Ethernet support. Suitable for high-speed home networks and gaming.
- ASUS ROG Rapture GT-AXE16000:** Designed for gamers, supports Wi-Fi 6E, ultra-low latency, and multi-gig internet.
- TP-Link Archer AX11000:** Provides strong long-distance coverage, multi-gig support, and built-in security features.
- TP-Link Archer AX55 (Wi-Fi 6):** Budget-friendly option with reliable performance.
