

Where can I find cable tray supports in the UK

AI Overview

Cable tray supports in the UK include brackets, hangers, and fixings designed to securely mount and suspend cable trays for efficient cable management in commercial and industrial installations.

Types of Cable Tray Supports

- 1. Cable Tray Brackets:** These are used to mount cable trays to walls, floors, or ceilings. They provide stability and can be stand-off brackets to maintain clearance from surfaces. Sizes vary, typically from 50mm to 300mm, and materials include pre-galvanized steel, hot-dipped galvanized steel, and stainless steel for corrosion resistance (Direct Channel).
- 2. G Hanger Support Brackets:** Designed for overhead support of cable trays, trunking, or baskets. They are available in sizes such as 100mm, 150mm, and 225mm, offering heavy-duty, rigid support for horizontal runs (Direct Channel).
- 3. Trapeze Support Brackets:** Pre-assembled for quick installation, trapeze brackets support cable trays with various widths and drop lengths, providing robust overhead support and easy integration into existing systems (Direct Channel).
- 4. Cable Tray Hangers:** Specialized accessories for suspending trays from ceilings or overhead structures. They help maintain proper alignment and prevent sagging, ensuring safety and compliance with installation standards (RS Online).

Materials and Finishes

Cable tray supports are typically made from steel (pre-galvanized or hot-dipped galvanized) for durability and corrosion resistance. Stainless steel (A316/A4) is used in environments requiring high resistance to moisture or chemicals (Direct Channel). PVC supports are also available for lighter-duty applications (Legrand UK).

Applications

- Wall-mounted trays:** Brackets secure trays to vertical surfaces.
- Ceiling-mounted trays:** Hangers and trapeze supports suspend trays overhead.
- Floor-mounted trays:** Brackets or pedestals provide stable support for heavy cable loads. These su...
