

Which company offers the cheapest LC yin-yang optical attenuator

AI Overview

SZBYNET appears to offer the most affordable LC/UPC yin-yang optical attenuators, with flexible ordering and direct factory quotations. SZBYNET provides LC/UPC yin-yang fiber optic attenuators, including 1dB fixed options, and emphasizes factory-direct sales, which often results in lower prices for bulk or small orders. Customers can request a quotation by sending detailed specifications, and the sales team responds within 24 hours. They support multiple payment methods (T/T, PayPal, L/C) and shipping options (express, air, sea), making it convenient for international buyers. SZBYNET's approach suggests competitive pricing due to direct factory access and flexible order handling. Bojan offers the BY-SJ510U1 10dB LC/UPC yin-yang attenuator, constructed from zinc alloy for durability. While it is high-quality and suitable for single-mode fiber systems, the minimum order quantity is 30 units, which may increase the overall cost for small buyers. Pricing is not explicitly listed online, so it may be higher than SZBYNET for small orders. Optcore provides LC fixed fiber optic attenuators with a wide range of attenuation (1-25dB) and claims affordable factory prices with a 5-year warranty. However, the product description does not specifically mention the yin-yang connector style, which may be a limitation if that feature is required. JKY Fiber Optics supplies LC fiber optic attenuators, including LC UPC and LC APC types, with attenuation values from 1dB to 30dB. While they offer a variety of options for single-mode fiber applications, pricing details are not provided online, and the focus is more on product variety than cost competitiveness. Recommendation For buyers seeking the cheapest LC yin-yang optical attenuator, SZBYNET is likely the best option due to its factory-direct pricing, flexible order quantities, and quick quotation process. Bojan is suitable for high-qua...
