

Yemen Integrated Power Supply

Overview

The agreement entails SDRPY purchasing petroleum derivatives from PetroMasila to supply over 70 power generation stations across various Yemeni governorates, aiming to strengthen the capacities of Yemeni institutions, support the stability of the electricity sector and. The agreement entails SDRPY purchasing petroleum derivatives from PetroMasila to supply over 70 power generation stations across various Yemeni governorates, aiming to strengthen the capacities of Yemeni institutions, support the stability of the electricity sector and. The power generation system in Yemen is in a very poor state and urgently needs to be resuscitated. Achieving this will require switching to cheaper and renewable energy sources like solar, making key repairs to the transmission and distribution system, restoring livelihoods to off-grid communities. A tripartite agreement was signed Wednesday between the Yemeni Ministry of Energy and Electricity, Yemeni petroleum company “PetroMasila,” and the Saudi Development and Reconstruction Program for Yemen (SDRPY). It represents all the energy required to supply end users in the country. Primary energy use in Yemen was 87 TWh and 4 TWh/million people in 2008 and 88 TWh (4 TWh/M) in 2009. We do not just supply fuel and supplies, but we also provide solutions that include equipping fuel stations, spare parts, and providing modern technical.
